

Richard Heinberg on Radio National

Richard Heinberg has featured twice on Australia's Radio National in recent weeks; on Late Night Live (segment starts about 15 minutes into the audio), and on the breakfast program AM .

Heinberg has been in Australia on a lecture tour with permaculturalist David Holmgren. They have been giving lectures and workshops on energy descent and the Oil Depletion Protocol. Heinberg is a well know peak oil educator and author of several books including *The Party's Over* and *Powerdown*. The topic of his latest book is the Oil Depletion Protocol. The protocol, originally proposed by Colin Campbell and colleagues of ASPO, is an international agreement for countries to match their oil imports to the declining oil production in order to reduce tension and competition for dwindling oil supplies.
