COULD AUSTRALIA’S TANKS RUN DRY?
AUSTRALIA’S LIQUID FUELS SECURITY

As the world’s ninth-largest energy producer, Australia has abundant renewable and non-renewable energy resources. Despite these resources, we are heavily dependent on imports of refined petroleum products and crude oil to meet our liquid fuel demand and our import dependency has increased over recent years. Any major interruption to the supply chain would significantly impact our way of life.

NRMA Motoring and Services is working with industry and community leaders calling for a more effective plan to address fuel security vulnerabilities and to develop and use non-oil based alternative fuels and vehicles.
